Critical Cover[®] AlphaGuard[®] Coveralls

Unique Blend of Strength, Comfort and Protective Qualities – Suitable for Use in Controlled Environments

Features & Benefits: AlphaGuard is the result of leading-edge technologies and brings to market a unique blend of physical properties that provides both the user and your production environment with a comfortable and efficient garment. AlphaGuard is a very breathable and comfortable material for the wearer while providing a high level of filtration efficiency for your environment. A low particle count adds another measure of environmental protection for your processes.

AlphaGuard material is not recommended for use with chemicals. An elastic back gathers the loose material in an effort to eliminate snags while reducing the billowing effect that can release particles into the environment.

Critical Cover® ComforTech® Frocks

Suitable for Use in Controlled Environments

Features & Benefits: ComforTech frocks provide a 99.9% filtration efficiency rate and protect wearers from light chemical splash, particles and biologicals while keeping them cool and comfortable. A breathable and lightweight garment, the ComforTech frock is also durable and will effectively meet your controlled environment needs.

A mandarin style snap collar adds style and comfort while providing additional coverage for the chest and neck area. The ComforTech frocks are cut and sewn to an appropriate length to ensure full coverage and with the nylon zipper option, the ComforTech frock adds another level of particle holdout and protection.

Critical Cover® NuTech® Lab Coats

Lightweight and Strong

Features & Benefits: NuTech Lab Coats are strong, yet soft to the touch and provides excellent protection without sacrificing comfort. This material is breathable and lightweight offering comfort and protection for the wearer all day. The non-confining tapered collar is designed like a shirt collar for style and comfort and the five-snap closure is to provide full coverage without gaps. The length is appropriately adjusted to size, to provide additional coverage for the wearer.

Critical Cover® AlphaGuard® Lab Coats

High Performance, Extra Comfort

Features & Benefits: The AlphaGuard material is soft and breathable. Additionally, these AlphaGuard lab coats are clean, durable and provide an 84% filtration efficiency rating in an effort to provide your teams with a comfortable and performing garment while meeting your Critical Environment protocols. Superior vapor transmission performance wicks perspiration through the fabric to keep workers cool and comfortable.

The tapered collar is stylish and comfortable and the five-snap closure is designed to provide full coverage without gaps. The length is appropriately adjusted to size, which provides additional coverage and protection for the wearer.

Critical Cover[®] GenPro[®] Lab Coats

Basic Protection for Non-Hazardous Environments

Features & Benefits: Designed for non-hazardous, general purpose environments, the GenPro lab coats are ideal for your personnel as well as for visitors to your facility. The GenPro lab coat is the perfect solution for protecting your clothes while offering comfort and breathability. The no-pocket design helps you control contaminants from entering or leaving sensitive areas.

Critical Cover[®] NuTech[®] Sleeves

Sonic Welded Seams

Features & Benefits: NuTech sleeves are designed with sonic welded seams for added durability and protection. This ensures the seam effectively matches the barrier properties of the material while increasing particle holdout. NuTech sleeves can be worn in many general-use applications.

Part No.	Size	Color
MS-01606-8	Univ.	White
MS-01606-4	XL	White

Tapered sleeve, elastic both ends, sonic welded seams, white, 300/case

Critical Cover[®] ComforTech[®] Sterile Sleeves

Ultra Clean Material

Features & Benefits: The durable ComforTech sleeve is made of our innovative, ultra-clean material to ensure a low particulate count and protection for your sterile work areas. Sonically welded seams make it impervious to fluids, particulates and many chemicals. The tapered cut provides a secure, yet comfortable fit. The larger end of sleeve is cuffed to expose the garment interior so it can be donned without touching the exterior. The sleeve is positioned inside the package for immediate donning, no fumbling to properly put on the sleeve. This will allow you to limit contamination risk factors resulting from extra handling of the garments and you will be dressed and ready for work quicker.

A pair of sleeves is sealed in a 1 mil primary bag with 150 pair of sleeves vacuum heat-sealed in a 3 mil secondary bag. This is surrounded by a 1 mil carton liner surrounded by a carton. A Certificate of Irradiation with confirming dot is affixed to the carton liner and carton.

Shoe & Boot Covers

Critical Cover[®] MaxGrip[®] Shoe Covers

Maximum Grip Protection

Features & Benefits: Our MaxGrip shoe covers are ideal for those areas where slip & fall protection is needed in damp to dry areas. The anti-skid properties of the MaxGrip sole have outstanding performance on a variety of surfaces and in a number of applications. The upper material used with our MaxGrip sole is made of BarrierTech[®] that provides particle holdout and protection from fluids and light chemical splash. Available in Cleanroom white and five sizes (S, M, L, Univ., XL) to ensure a proper fit. MaxGrip is suitable for use in a Controlled Environment.

Anti-skid sole, thread colors for convenient size identification, serged seams 100 pair/case

Critical Cover[®] MaxGrip[®] Boot Covers

Superior Grip Protection

Features & Benefits: MaxGrip[®] Boot Covers provide slip and fall protection on damp and dry floors. With the MaxGrip[®] anti-skid soles in these top quality boot covers, safety is paramount. The sole material is also extremely clean, durable and strong enough to stand up to the most abrasive floor surfaces. The AquaTrak[®] upper material is soft, strong, flexible and a fluid resistant material that also provides appropriate particle holdout. These high top boot covers fit over the calf to provide a comfortable fit and prevent the boot cover from sliding down.

Facemasks & Shields

PFL[®] N95 Particulate Respirator

NIOSH Approved Respirator

Features & Benefits: The Positive Facial Lock[®] (PFL[®]) N95 Particulate Respirator meets the World Health Organization (WHO) and the Centers for Disease Control (CDC) recommended protection levels (where applicable) for many airborne contaminants. NIOSH Approved, our N95 delivers the appropriate amount of filtration efficiency and when combined with a trio of patented and unique design features, also delivers the user a comfortable, fluid resistant custom fitting facemask. The integrated Magic Arch[®] technology creates a breathing chamber within the facemask by holding it away from the user's nose and mouth. Our PFL technology, incorporating an integrated Twist Seal[®] chin piece, helps the wearer create a perfect fit every time. ASTM Barrier Level 3.
