

Roll-O-Matic[®] Cleanroom mop

Contamination control the fast and reliable way

The superior self-wringing cleanroom roller mop

Effective cleaning and disinfection of clean and controlled environments where following strict monitoring procedures is a common and well-known challenge.

With Roll-O-Matic® – the leading roller mop system in the global market – you can achieve excellent results quickly and effectively while also reaching superior contamination control results.

With a choice of many different Roll-O-Matic® refills – designed to absorb, disinfect or clean – the range perfectly meets the demands of any cleanroom or controlled environment.

Double bucket system does the trick

Superior contamination control results are guaranteed, no matter which Roll-O-Matic® solution you choose.

Options to use the system with:

1. Vileda Professional CE Bucket Trolley with single or double bucket options, which separates clean chemicals or disinfectants from dirty solutions
2. Separate single bucket only

Self-wringing for fast and easy handling

Roll-O-Matic® is the ideal tool for cleaning or disinfection of floors, walls and ceilings in hygiene sensitive areas.

It has a self-wringing mechanism and is best used with the “pull & lift” technique recommended for cleaning and disinfecting. It's simple to use and eliminates bulky and expensive wringers.

We've been around

Vileda Professional has been a leading player in the cleaning industry for over 50 years. Also working with many blue chip clients in the Controlled Environment market.

Naturally, our products and systems meet business standards and practices such as ISO 14644-5, IEST RP CC018 and life science GMPs.

With more than 60 engineers and scientists constantly developing business-leading solutions we know what you need to keep your cleanroom clean – you can count on that.

Straight head design

allows user to flip over mop head to use both sides.

Stainless steel handle – compatible with gamma and autoclave sterilization.

Colored clips allow for color coding of equipment.

Extendable aluminium handle with ergonomic grip – reduces worker fatigue.

Integrated wringing mechanism to use with “pull & lift” technique.

High performance tear free cleanroom foam exhibits the highest level of cleaning, disinfection and durability.

Trolley specifically designed for use in controlled environments, with no dirt traps, and fully autoclavable. The trolley can be customized to your needs, with single or double buckets and extra storage for clean refills.

1. Foam refill

The ideal choice for general purpose cleaning to “Absorb” spills, liquids or to apply disinfectants.

2. Microfiber laminated refill

The premium selection for “Cleaning” with the right balance between absorption and cleaning of contaminants.

3. Polyester laminated refill

The optimum solution for “Disinfection”. Optimum fluid release leaves a layer of disinfectant, to meet high contact time requirements.

4. White absorb refill

The white foam is extremely durable and perfect for spill pick-up, applying disinfectant and cleaning particulates.
